HEAVY DUTY DOOR HOLDERS

Arguably the single most important fire safety mechanism, electromagnetic door holders guard against the lethal spread of toxic smoke and fumes - by far the greatest cause of death in fires.

The VimpeX EN 1155 approved heavy duty range of door holders offers the installer a choice of mounting styles and holding power.

Mounted onto a fixed surface, these door holders ensure retention of the fire door by means of a smart metallic keeper plate. Interfaced with the fire alarm system, the door holders are deenergised as soon as the fire is detected thus releasing the door without the potentially harmful delay suffered by other types of devices.

FEATURES

- Two versions available: wall mounted and floor mounted
- Heavy duty casting is vandal resistant
- Two holding forces available - 200N and 500N
- Designed for where accidental damage or vandalism is a problem
- Ideal for areas such as schools, hospitals, warehouses, car parks
- Approved to EN 1155 and CE marked
