SRP Defoamer

SRP Defoamer is a defoaming agent and surface protector suitable for use in PPE dishwashers used for cleaning of breathing apparatus (carrying frames, hoses, regulators, air cylinders). The agent efficiently combats foam formation at washing temperatures over 50° C. It contains special additives which help prevent soot, oil, grease and similar dirt from binding to certain plastics, rubber, synthetic textiles, or painted and lacquered surfaces, thus facilitating subsequent cleaning. SRP Defoamer does not build up any film on the surfaces, it is removed and reapplied each time the item is washed/cleaned.

Instructions for use

The agent is automatically dosed into the washing machine in the final rinsing water. After washing, hang the equipment to dry.

Dosage

Automatic dosage in PPE dishwashers designed for cleaning breathing apparatus: 0.15 % of agent is dosed into the final rinsing water.

NB Do not overdose.

Environmental information

Product ingredients are rapidly biologically degradable according to OECD criteria. Bottles, canisters, tubs and labels are made from polyethylene/polypropylene and can be recycled by sorting at source as hard plastic packaging.

Warning

Causes severe eye irritation

Wear protective gloves and safety glasses. Avoid inhaling vapour or spray.

IN THE EVENT OF SKIN CONTACT: Wash with plenty of water.

IN THE EVENT OF CONTACT WITH EYES: Carefully flush with water for several minutes. Remove contact lenses if this can be done without difficulty. Continue flushing. If eye irritation persists, contact a physician.

Contains: Ethoxylated and propoxylated fatty alcohol 15 - 30 %.

Packaging

10 litre Art. no.: 10 0100 01

Protect from frost
