

LEJON KEMI

Hose Cleaning Agent

Lejon Kemi Hose Cleaning Agent is an alkaline water-based detergent optimised for soaking fire hoses prior to washing in a hose washing machine. The agent effectively loosens soot, oil, grease and other hard-to-remove contamination from plastic, rubber, metals (e.g. stainless steel, aluminium, brass), painted and lacquered surfaces. Contains special additives which bind soot particles and impregnating agent which helps prevent soot, oil and grease binding to plastics and rubbers, thus improving the cleaning effect of subsequent washing.

Dosage

0.5 – 1 % (for soaking in tank for 6 - 24 hours)

1 – 3 % (for soaking in tank for 2 - 6 hours)

3 – 5 % (for soaking in hot water at 50° C to max 60° C for 30 - 60 minutes)

Instructions for use

Soak the fire hoses in a tank with the detergent solution prior to washing in the hose washing machine.

Dosage will depend on the soaking time, degree of soiling and tank water temperature (see above).

NB Hot water will considerably improve the cleaning effect, but must not exceed 60° C.

Avoid inhaling soot or skin contact with soot or the washing solution. Use protective gloves. Where there is a risk of splashing, use safety glasses.

NB Do not allow the product to dry out on glass or anodised aluminium as these materials may be attacked or stained.

Environmental information

Surfactants and complexing agents in the product are rapidly biodegradable in accordance with OECD criteria (301A-301F). Surfactants are mainly based on renewable materials of vegetable origin. The packaging is made from polyethylene/polypropylene and can be recycled by sorting at source as hard plastic packaging or incinerated for energy recovery.

Danger

Causes skin irritation. Causes severe eye damage

Wear protective gloves and safety glasses. Avoid inhaling vapour or spray.

IN THE EVENT OF SKIN CONTACT: Wash with plenty of water. Remove contaminated clothing. IN THE EVENT OF CONTACT WITH EYES: Carefully flush with water for several minutes. Remove contact lenses if this can be done without difficulty. Continue flushing. Contact poisons information centre or a doctor.

Contains: Sodium silicates < 15 %, Sodium hydroxide < 1% Fatty alcohol ethoxylates C9-C11 and C12-C14, EO 3-9. < 10 %

Packaging

25 litres Art. No: 07 0250 01
